3.2 Project Details

a) Lay description (Maximum 200 words)

Please outline, in terms that any non-expert would understand, what your research project is about, including what participants will be required to do. Please explain any technical terms or discipline-specific phrases.

In this research project, the objective is to build a system that would give recommendation to an investor whether to invest in a particular stock or not. The system would be based on the analysis of previous data of stock prices. The data to be used for the research are stock prices and related information that publicly available to all either through stock exchanges or social media. The project involves statistical analysis on the acquired data and application of machine learning models to obtain the desired outcome.

b) Research objectives (Maximum 150 words)

Please summarise briefly the objectives of the research.

The objective is to analyse the patterns in the stock price fluctuation, the seasonality effect underneath the stock price pattern and if possible, how the global events affect the stock prices. Based on the analysis, the main objective is to find the right stock for investing or if a particular stock is right for investing.

c) Research location and duration

Location(s)/Population*	Dundalk, Ireland
Research start date	4-Mar-22
Research end date	30-Aug-22
Approximate duration	6 months

* If location/Population other than DkIT campus/population, provide details of the approval to gain access to that location/population as an appendix.
